Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-4, drawn to a ligand for human epithelial cells.
- II. Claim 5, drawn to a method of identifying a small molecule ligand.
- III. Claim 6, drawn to a ligand specific for human liver cancer cells having the chemical structure as claimed.
- IV. Claim 7, drawn to a method of identifying peptidomimetic ligand.
- V. Claim 8, drawn to a ligand specific for human lung cancer cells having the recited chemical structure.
- VI. Claim 9, drawn to a ligand of the structure as claimed.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different

Art Unit: 1639

inventions are drawn to different methods using different components and steps that results in different compounds of different effects and/or functions.

Inventions (I, III, V and VI) are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are drawn to structurally different compounds that have different functions/effects.

Inventions (II and IV) and (I, III, V and VI) are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are drawn to different statutory subject matter i.e., different methods and structurally different compounds.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, and the search required for Group I is not required for Groups II-VI,

Art Unit: 1639

specifically the literature searches, restriction for examination purposes as indicated is proper.

Claims 1, 6, 8 and 9 generic to a plurality of disclosed patentably distinct species comprising species included in each of the generic compound having the claimed structure.

Applicants are to elect a single species from whichever generic compound of the claimed formula is elected.

Each of the species covered in each of the genus differs in structure and mode of action. A prior art reference anticipating one species would not render obvious the other species.

Applicants are required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Should applicants traverse on the ground that the species are not patentably distinct, applicants should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicants are advised that the reply to this requirement to be complete must include an election of the invention to be

Art Unit: 1639

examined even though the requirement be traversed (37 CFR 1.143).

Applicants are reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to T. D. Wessendorf whose telephone number is (571)272-0812. The examiner can normally be reached on Flexitime.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Andrew Wang can be reached on (571)272-0811. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
